Art Unit: 3652

1. The drawings are objected to because draftsman report, two different #76 in Fig.

5. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: "dolly 76", "holes 76", "dollies 76".

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over French Patent #2631948 in view of Oslin et al, Gieringer et al, Pinder and Sebor.

Art Unit: 3652

French Patent # 2631948 discloses a substantially similar dolly carrier and method. French Patent # 2631948 lacks locking structure, towing structure at both ends, roller guides and stackable dollies. Oslin et al disclose the use of locking structure for the dolly. Gieringer et al disclose the use of towing structure at both ends of the carrier. Pinder discloses the use of roller guides. Sebor discloses the use of stackable dollies. It would have been obvious to a mechanic with ordinary skill in the art at the time the invention was made to provide these features to the primary reference. The motivation is for better handling of the dollies.

6. The remaining references are cited to show similar structure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Bratlie whose telephone number is (703) 308-2669. The examiner can normally be reached on Mondays through Thursday from 6:30 to 5:00. Friday is the examiner's day off.
